- Microbiological definition:

  m: Level of the test organism which is acceptable and attainable in food. It separates good quality from marginally acceptable quality; up to and including M.

  M: The upper acceptable concentration of a test organism. A count above M for any sample unit is unacceptable.

  c: Maximum allowable number of result between m and M.

  n: Number of sample units chosen separately and independently.

## PACKAGING

Primary pack	••	Plastic bucket with cup
Secondary pack		Carton with inside 2 plastic bucket
Net weight	:	7 kg (2 x 3,5 Kg)
Packs for layer		12
Number of layer		9
Pallet type	:	800x1200 mm (108 cartons)

The label, present on the Primary pack, contains legal wordings in accordance with regulations.

Transport :	At ambient storage temperature
Certification :	Goods will have Certificate with the following analysis: in accordance with internal plan as per the customer
	The product, in the original packaging, preserved in a fresh and dry storage (10-25°C), will remain unchanged
Maintinance and Durability :	from the original characteristics for 24 months from the date of production. If the original packaging is opened,
Maintinance and Durability :	the characteristics will remain unchanged for 90 days, if all the hygienic requirements are respected. Storage
	conditions: Cool, dry storage, free from foreign odours and infestation.
	See table section "ALLERGENS". Mix the product before use.
Formality and Limits of Use :	Pour the product directly in to the ice cream container. Let it stand in the blast freezer for about 30
ormanty and Limits or osc .	minutes, then place it in the ice cream showcase. As an alternative leave the container inside the showcase
	for about 2 hours before serving
Recommended dosage :	How much is necessary
The quality system of NADDI 1011 conforms	to the requirements BBC and IEC

The quality system of NAPPI 1911 conforms to the requirements BRC and IFS.

The company has an internal chemical-physical and bacteriological laboratory. Utilizes external laboratories certificates as well.

The company operates under H.A.C.C.P.

A sampling plan provides for the internal analysis drawn from raw materials, semi-manufactured and finished product.

The analytical methods used are in accordance with the current legislation.
